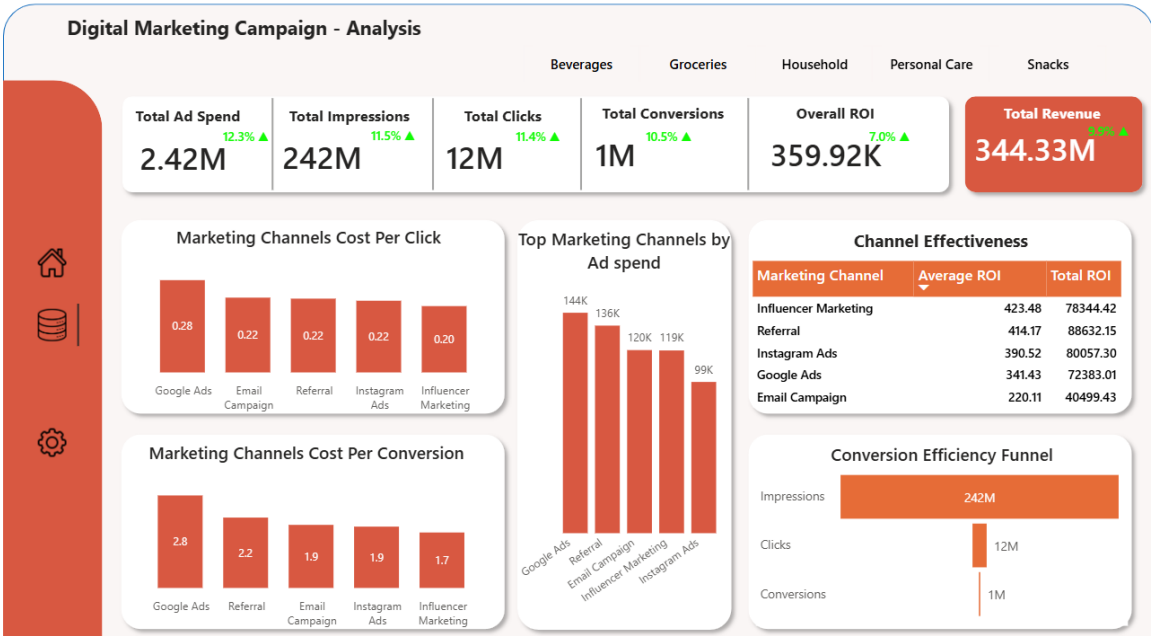
Digital Marketing Campaign Performance Analysis and Optimization

A concise overview of the purpose of the analysis, the scope, and the main takeaways from the dashboard.

Dashboards



Project Objective & Dataset Overview

- **Goal:** To analyze the performance of various marketing campaigns across channels and products to optimize ad spend, maximize conversions, and improve ROI.
- **Time Frame:** January 2026 – February 2026.
- **Key Metrics Used:** Total Ad Spend, Total Impressions, Total Clicks, Total Conversions, ROI, and Revenue.

Methodology

- **Tool Used:** Excel for Data cleaning, Power BI for data modeling, visualization, and insights generation.
- **Approach:**
    1. Data cleaning and transformation.
    2. KPI creation (Ad Spend, ROI, Cost per Click, Cost per Conversion).
    3. Visualization design for clarity and storytelling.
    4. Segmentation by marketing channel, product category, and time period.

Key Insights

Overall Campaign Performance

- **Total Ad Spend:** 2.42M (+12.3% from previous Month).
- **Total Impressions:** 242M (+11.5%).
- **Total Clicks:** 12M (+11.4%).
- **Total Conversions:** 1M (+10.5%).
- **Overall ROI:** 359.92K (+7%).
- **Total Revenue:** 344.33M (+9.9%).

  The campaign delivered growth across all major performance indicators, with revenue growth outpacing ad spend growth, indicating improved efficiency.

Channel Performance Analysis

Cost Per Click (CPC):

- Lowest CPC: Influencer Marketing ($0.20)
- Highest CPC: Google Ads ($0.28)

  - ❖ Influencer marketing is more cost-efficient in generating clicks.

Cost Per Conversion (CPCv):

- Lowest CPCv: Influencer Marketing ($1.7) and Instagram Ads ($1.7).
- Highest CPCv: Google Ads ($2.8).

  - ❖ Social and influencer channels are outperforming search in conversion cost efficiency.

Channel Effectiveness (ROI):

- **Top ROI performer:** Influencer Marketing (Avg ROI: 423.48).
- **Strong performers:** Referral (414.17) and Instagram Ads (390.52).

  - ❖ Channels relying on organic-like trust-based recommendations and visual engagement are delivering higher ROI.

Top Ad Spend by Channel:

- Highest spend: Google Ads ($144K) and Referral ($136K).

  - ❖ Despite high spend, Google Ads is not yielding proportionate ROI compared to influencer-driven channels.
  - ❖ Also, Email Campaign is really underperforming (Low ROI) despite the amount of Ad spend.

Product Performance Analysis

- **Top Revenue-Generating Products:** Cold Drink & Dishwasher Liquid ($19M each), Cooking Oil & Garbage Bags ($18M each).
- **Top Ad Spend by Product:** Cooking Oil ($129K), Moisturizer ($128K), Garbage Bags ($127K).
    - ❖ Products with high ad spend (Cooking Oil, Moisturizer) align closely with high revenue, but some mid-revenue products also received high investment, suggesting potential over-investment.

Time-Based Trends

- **Ad Spend:** Peaked in Jan 2025 ($211.7K), then dropped sharply in Feb 2025 ($59.9K).
- **Revenue:** Mirrored ad spend trends, peaking in Dec 2024 ($38M) and falling in Feb 2025 ($4M).

    - ❖ There is a direct correlation between ad spend and revenue (consistent investment sustains higher revenue).

Recommendations

- **Reallocate Budget Towards High-ROI Channels:**

    - ❖ Increase spending on Influencer Marketing, Referral, and Instagram Ads.
    - ❖ Reduce Google Ads spend unless targeting highly specific keywords.
- **Optimize Campaigns for Underperforming Channels:**
    - ❖ Conduct A/B testing on Google Ads creative and targeting to improve CPCv and ROI.
- **Sustain Investment Levels Over Time:**
    - ❖ Avoid drastic drops in ad spend to maintain revenue stability.
    - ❖ Implement a phased reduction strategy if budget cuts are necessary.
- **Product-Specific Strategy:**
    - ❖ Increase spends on top revenue products with proven ROI (Cold Drink, Dishwasher Liquid).

    - Review investment in lower-revenue but high-ad-spend products to ensure profitability.
- **Enhance Conversion Funnels:**
    - Current funnel shows significant drop-off from clicks to conversions.
    - Introduce retargeting campaigns and improved landing page experiences to boost conversion rates.
- **Seasonality Consideration:**
    - Leverage months with historically higher revenue (Dec–Jan) by launching targeted seasonal promotions.

Conclusion

The digital marketing campaigns delivered positive growth, but optimization opportunities exist in channel allocation, conversion rate improvement, and consistent budget deployment. Influencer and social media channels present the strongest ROI potential for the next campaign cycle.
